

A little more Energy and Power Practice

Physics and Mathematics of Sustainable Energy

College of the Atlantic. September 22, 2022

The average Maine home uses 550 kWh of electrical energy in a month. **Estimate** the following quantities.

1. The monthly cost of this energy. (Currently electricity in Maine is about \$0.30 per kWh.)
2. The average power drawn by the house. Express your answer in Watts and kW.
3. The average amount of residential electrical energy used per person per day by a Maine resident.
4. There are roughly 10,000 year-round residents on MDI. What amount of electrical power is needed for all year-round MDI residents?
